PROFILE

Front-end developer specialising in React, TypeScript and Tailwind CSS. I enjoy designing and developing intuitive, accessible and well-structured interfaces, paying close attention to both the user experience and code quality. I consider myself to be detail-oriented and diligent, and I continue to hone my skills through personal projects where I put new ideas and best development practices into practice.

EXPERIENCE

Front-End Developer (Freelance Project) – Bakery website – Delicious treats 2

Jan 2026

A website for a bakery, designed to showcase products and attract customers.

- I integrated Google Sheets as a CMS so that the client can update products and content independently, without the need for technical support.
- I implemented a contact form with validation using react-hook-form, prioritising a clear and accessible user experience.
- I developed a responsive interface using Tailwind CSS and Next.js, optimised for mobile devices.

Front-End Developer (Freelance Project) – Exclusive – E-commerce

Feb 2026

An online fashion and electronics shop with comprehensive e-commerce functionality.

- I developed reusable components using React and TypeScript, applying SOLID principles to ensure scalability and maintainability.
- I implemented global state management using Zustand to handle the shopping basket and product filtering.
- I designed a responsive interface using Tailwind CSS, inspired by real-life fashion and electronics shops.

Front-End Developer (Freelance Project) – Landing Page – Aramburu Psicología

Dec. 2025

A website for a psychology practice designed to showcase its services and make it easier for patients to get in touch.

- I developed an accessible and responsive interface using React and Tailwind CSS, designed to convey confidence and clarity to patients.
- I implemented a contact form with validation using react-hook-form, prioritising simplicity and a good user experience.
- I designed reusable components in React to make the project easier to maintain and scale.

FORMACIÓN

Front-end Development — Self-taught 2023 – present.

Continuous learning through official documentation, real-world projects and development communities.

SKILLS

- HTML, CSS, Javascript
- React, NextJS, Typescript, Tailwind CSS
- Zustand, Integración de APIs REST
- GitHub, Storybook, Figma

QUALITY AND METHODOLOGIES

- Web accessibility
- SOLID Principles
- Clean Architecture
